# ABOUT

**edusap**

**EDUSAP** is a complete educational institution management system with transparency between students, teachers and parents. It's a platform, leveraging the advanced online technologies with primary focus on the ease of use. Our bottom approach helps to cater the needs of the management as well as the students. The platform has the most sophisticated admin control panels that enables a wide range of features and customisability. In our future releases we plan to implement predictive analytics for our product, to improve user engagement. **EDUSAP** is available in Web, Android and iOS applications.

**codesap**

Builders of a better world, focusing on technology to bring the maximum potential of mankind to its pinnacle. We code in the realm of mobile & web, aiming to empower human beings so that technology is breathable just like air. We gaze upon a future where technology is no longer a constraint to an elite group and rather spans to cater the needs of humanity as a whole. We strive with the best of our capabilities to draw that horizon closer to us. So we did our first product in the education domain.
